Gol Gol Wind Farm

470k Expected homes powered
840MW Expected capacity

470k Expected tonnes of emissions avoided

Gol Gol Solar Farm

254k Expected homes powered
600MW Expected capacity

255k Expected tonnes of emissions avoided

Gol Gol Battery

1500MW/12 hour
Expected capacity and duration

Project update

South West Renewable Energy Zone Access Rights Tender

Since April 2024, Squadron Energy has been participating in the highly competitive South West Renewable Energy Zone (REZ) access rights tender process. The tender was run by AEMO Services to determine which projects will receive rights to connect to the Project EnergyConnect (PEC) transmission line.

The result of the tender process was [announced on 23 April](#). Unfortunately, the Gol Gol Renewable Energy Projects were not selected for connection access rights.

The indicative capacity available for the South West REZ was 3.98GW. AEMO Services highlighted the strong interest in the tender, receiving bids representing more than 15GW of generation and storage infrastructure. [View the press release](#).

If you have any questions regarding the South West REZ, please contact EnergyCo on 1800 359 545 or south.west.community@energyco.nsw.gov.au.

Next steps

Squadron Energy is continuing to develop the Gol Gol Renewable Energy Projects and is exploring other options and connection pathways.

Several possibilities are under investigation, including connecting to the existing 220kV transmission line. We are in regular discussions with Transgrid and EnergyCo and other key stakeholders to understand the opportunities for the future of the project and will keep the community informed as this progresses.

In the meantime, we are continuing project development activities and wind monitoring campaign. Over the coming months, we will continue to refine the project design based on wind data results and feedback from community engagement.

The project team will visit the area soon to meet with stakeholders. We encourage you to share your questions, concerns, and feedback with the team. Please contact us if you would like to arrange a meeting using the contact details below.

Community sponsorship

Our community sponsorship program is ongoing, and we encourage local groups to apply. The program allows us to partner with local groups and organisations to deliver events, programs, and infrastructure to foster community connection and promote local economic development.

If you are interested in applying for sponsorship, please visit:

Squadron Energy news

Squadron Energy Aboriginal and Torres Strait Islander Scholarship

Squadron Energy is proud to offer the [Squadron Energy Aboriginal and Torres Strait Islander Scholarship](#) in partnership with the University of Newcastle. The scholarship aims to support Aboriginal and Torres Strait Islander students pursuing studies in renewable energy, engineering, environmental science, and other disciplines that are integral to the energy transition.

Frequently asked questions

Curious about wind energy and how wind farms work? We have put together answers to some of our most [frequently asked questions](#).

Gol Gol Wind Farm was proud to sponsor the purchase of an electronic scoreboard for the Wentworth District Football Netball Club
