Project update

South West Renewable Energy Zone Access Rights Tender

Since April 2024, Squadron Energy has been participating in the highly competitive South West Renewable Energy Zone (REZ) access rights tender process. The tender was run by AEMO Services to determine which projects will receive rights to connect to the Project EnergyConnect (PEC) transmission line.

The result of the tender process was announced on 23 April. Unfortunately, Koorakee Energy Park was not selected for a connection access right.

The indicative capacity available for the South West REZ was 3.98GW. AEMO Services highlighted the strong interest in the tender, receiving bids representing more than 15GW of generation and storage infrastructure.

If you have any questions regarding the South West REZ , please contact EnergyCo on 1800 359 545 or south.west.community@energyco.nsw.gov.au.

Next steps

Squadron Energy is continuing to develop Koorakee Energy Park and is exploring other options and connection pathways.

Several possibilities are under investigation, including connecting to the existing 220kV transmission line. We are in regular discussions with Transgrid and EnergyCo and other key stakeholders to understand the opportunities for the future of the project and will keep the community informed as this progresses.

In the meantime, we are continuing project development activities such as biodiversity studies. Over the coming months, we will continue to refine the project design based on study results and feedback from community engagement.

The project team will visit the area soon to meet with stakeholders. We encourage you to share your questions, concerns, and feedback with the team. Please contact us if you would like to arrange a meeting using the contact details below.

Community sponsorship

Squadron Energy sponsored the Christmas Carnival organised by the Rotary Club of Robinvale-Euston in December 2024. This was a well-attended fun day for all ages that we were delighted to support.

In March the Isolated Children's Parents' Association (ICPA) Balranald will be hosting the organisation's NSW conference in Euston. Squadron Energy is pleased to be among the sponsors supporting the event.

Our community sponsorship program is ongoing, and we encourage local groups to apply. Since starting the program, it has been great to see the number of local organisations making a difference in the Euston-Robinvale areas with our support.

Squadron Energy news

Squadron Energy Aboriginal and Torres Strait Islander Scholarship

Squadron Energy is proud to offer the Squadron Energy Aboriginal and Torres Strait Islander Scholarship in partnership with the University of Newcastle. The scholarship aims to support Aboriginal and Torres Strait Islander students pursuing studies in renewable energy, engineering, environmental science, and other disciplines that are integral to the energy transition.
