Dear Mr Maddocks

I have been contacted recently by [REDACTED], who has expressed concern that some sections of the proposed Sapphire Wind Farm will have a visual impact upon the heritage listed community of Wellingrove and affect property values in the district.

I would be grateful if consideration could be given to the concerns and points raised by [REDACTED] in relation to this matter and for your advices at your earliest convenience.

Any assistance you may be able to provide would be greatly appreciated.

Yours sincerely

PO Box 1708
NEWCASTLE NSW 2300

Dear Mr Maddocks

We wish to advise you again of our opposition to the proposed Sapphire Wind Farm, although the term 'wind farm' is a misrepresentation of the actual intention of the proposed 'set-up'.

We are again requesting a photographic view from our farm of the whole number of turbines that are proposed.

According to the sketch maps that we have obtained from neighbours, it seems that our whole western horizon will be marked by these monster turbines. Also, they appear to be far too close to our boundaries.

We are finding it very difficult to obtain any information from you regarding this proposal - why is this?

Your response would be appreciated.

Thank you.

Re: Visual impact of Wind Prospect CWP Pty Ltd's ('Wind Prospect')
proposed Sapphire Wind Farm on the Danthonia Community

Dear Adrian,

We appreciated the opportunity to meet you at the Danthonia Community ('Danthonia') on Friday, 7 August to discuss the Sapphire Wind Farm project.

Firstly, I would like to thank you for the photomontage you provided, which gives us some guidance as to the potential visual impact of the proposed Sapphire Wind Farm (the 'proposal') on Danthonia and its residents.

We confirm that Danthonia is a growing residential community, with development consent for an integrated community of up to 400 people. As advised, the current population at Danthonia stands at around 150 residents.

Danthonia is the primary community of Church Communities Australia ('CCA'), a recognised religious order, formerly known as Bruderhof Communities in Australia Ltd ('BCA'). We are the Australian branch of Church Communities International ('CCI'), which has its headquarters in New York state, USA. CCI funded the original property purchase and subsequently CCA's start up in Australia.

In 1999, CCI delegates selected Danthonia as the prime location at which to start a community in Australia. The natural beauty of the property and the surrounding rural landscape was a significant factor in selecting Danthonia.

It took BCA from 1999 until into 2003 to gain permission to accommodate and grow our community at Danthonia. An amendment to the Inverell Shire's Local Environment Plan was approved in 2002 by then NSW Planning Minister Dr Andrew Refshauge, following extensive reviews by the NSW departments responsible for water, agriculture, regional development, and planning. Approval of BCA's Development Application followed in 2003.

Since then we have sought to develop the Danthonia community and our adjacent landholdings (including the 'Dursley' property, immediately east of Danthonia) in a manner that shows respect for and sensitivity to the natural surroundings and heritage of the local landscape. This includes considerable investment in best-practice land care. For example, we have planted tens of thousands of trees on our properties in an effort to sustain the environment and encourage flora and fauna, particularly birds.

In 2006, CCA acquired 'Swan Peak', a property immediately north of Danthonia. Swan Peak is a distinctive landmark of significance to the Indigenous community, and is well-loved by Danthonia's residents and local neighbours as much for its profile on the community's northern horizon as for the recreation and views its slopes afford.

With this in mind the prospect of a major wind farm located so close to our property and also falling within a significant sweep of our view field is of great concern to CCA and the Danthonia community residents.

Having reviewed Wind Prospect's Preliminary Environmental Assessment ('PEA') for the project and the Director-General's Requirements ('DGRs') published by the NSW Department of Planning, we note that community consultation is a key component of the planning and environmental process for the project and in particular a matter which must be addressed in detail in the Environmental Assessment which Wind Prospect is now preparing.

We would anticipate that a development on the scale you propose would be subject to at least as stringent a review process as our initial application to develop a community at Danthonia. We are, therefore, genuinely concerned that a residential community as large as ours has only just now been contacted by Wind Prospects regarding the wind farm proposal.

As you would be well aware, both the *AusWind Best Practice Guidelines for Wind Farm Developments*, noted as a 'key reference' document in Wind Prospect's PEA, and *AusWind's Wind Farms and Landscapes Values: National Assessment Framework* ('Framework'), referenced in the DGRs as relevant guidelines, point out the importance of any wind farm proponent engaging stakeholders at a very early stage of the project.

As a landowner and large community who is likely to be significantly affected by the project we would appreciate your advice as to how Wind Prospect will follow AusWind's Framework, which recommends distinct steps in the assessment of landscape values process. We strongly believe that either certain preliminary stakeholder consultation has been overlooked or alternatively may be just beginning, if our recent meeting is anything to go by. In this regard we note that Step 1A of the Framework recommends that initial investigation 'include preliminary community input through direct consultation...'.

It would be helpful to us if you would provide us with an outline of the consultation process Wind Prospect proposes to undertake insofar as it relates to the DGRs and more importantly to CCA and our community. Further, we ask that you keep us informed of major developments or alterations to the project.

In view of the above we believe the most appropriate course of action is to meet with you and your project team to obtain more detailed information from you about the project and also to discuss possible modifications to the project to alleviate any issues of concern to CCA and the community. Finally, we have retained several experts to assist us in evaluating the likely visual impact the proposal has on our community and hopefully also to assist you in assessing this level of impact with the aim of reducing any such visual impact.

I would appreciate your advice as to when we could meet so that we can work with you to address what I believe are the legitimate concerns of CCA and the Danthonia Community.

Yours Sincerely,

Chris Voll
Director

Attention Mr Adrian Maddocks

Wind Prospect CWP Pty Ltd
45 Hunter Street
NEWCASTLE NSW 2300

Dear Sir

Proposed Sapphire Wind Farm

Reference is made to the proposed project application by Wind Prospect CWP Pty Ltd ('**Wind Prospect**') for the Sapphire Wind Farm in the Inverell Local Government Area.

We act for Church Communities Australia Limited who are the proprietors of the properties known as '*Danthonia*'/'*Shanta Clare*', '*Dursley*' and '*Swan Peak*' on the Glen Innes Road at Inverell (henceforth referred to as '**the Danthonia Properties**'). These lands are specifically as follows:

'Danthonia'/'Shanta Clare', Glen Innes Road, Inverell	5/1044392
'Dursley', Glen Innes Road, Inverell	118/753316
'Swan Peak', Inverell	A/400938, 2/1096578, 1/113969 & Auto Consol 8481-238

As you are aware, our client operates an integrated community at the Danthonia properties where currently 175 persons reside and with approval for up to 400 persons. In addition, the site includes community facilities, church and religious premises, a sign-making factory as well as other community and agricultural uses. The Danthonia community's sensitivity to the impacts of wind turbines located in its visual catchment are significantly heightened from those experienced by other landowners for two reasons:

1. the significantly greater number of persons potentially exposed to impacts; and
2. the special nature of the religious and community uses on Danthonia means that impacts on the spiritual and contemplative experience of users of Danthonia would be of a qualitatively more severe nature than those experienced by the normal users of agricultural lands.

It is noted that Wind Prospect released two layouts of turbine locations but that subsequently the company is in the process of reviewing and revising these layouts. It is further noted that Wind Prospect gave a commitment to Church Communities Australia Limited for further consultation following the revision of the turbine layout plans.

MINTER ELLISON GROUP AND ASSOCIATED OFFICES

SYDNEY MELBOURNE BRISBANE CANBERRA ADELAIDE PERTH GOLD COAST DARWIN
AUCKLAND WELLINGTON HONG KONG SHANGHAI JAKARTA LONDON

Church Communities Australia Limited have engaged Mr Michael Wright of the leading visual assessment consulting firm, Spackman Mossop Michaels, to review the potential impacts of the turbine layout plans on the Danthonia properties. While this assessment was based upon the previous turbine layouts proposed by Wind Prospect, it identifies particular areas of high sensitivity where the installation of wind turbines should be avoided. While it is appreciated that Wind Prospect are currently revising the turbine layout, this report in identifying areas of high sensitivity, assists in delineating areas where the location of turbines should be avoided. Hence, it is considered this assessment would be of assistance to Wind Prospect in the revision of its turbine layouts and would assist in a co-operative and consensual resolution of any issues between Wind Prospect and Church Communities Australia Limited.

We attach a copy of the report from Spackman Mossop Michaels which is self-explanatory. It should be noted that the recommendations in this report have been limited to only those locations with severe and unacceptable impacts on the Danthonia properties as it is recognised that simply seeking to exclude wind turbines from the visual catchment of the Danthonia properties or seeking an arbitrary exclusion zone are not practical outcomes having regard to the objectives of Wind Prospect.

Therefore, the high sensitivity exclusion zones identified by the Spackman Mossop Michaels report provide a minimalist approach to exclusionary zones based upon maximum impacts. It will be noted there are two primary exclusion areas:

- (a) the highly prominent skyline ridge area adjacent to Swan Peak, with the Swan Peak mountain identified as a highly significant regional landform feature where additional protection is justified and where it is additionally noted Swan Peak forms an important visual landmark not merely for neighbouring properties but for the general public travelling between Inverell and Glen Innes; and
- (b) the rear field Valley area to the east of Danthonia where the high density of turbines provides significant visual clutter to the rear field view from Danthonia.

Our clients are seriously concerned about the potential impacts of the proposed wind farm on its operations. However, we have undertaken this visual assessment to seek to find common ground and options where the Danthonia community can co-exist with Wind Prospect's Sapphire Wind Farm.

We would be happy to discuss in detail the proposals contained in the attached report with a view to reaching an in principle agreement on the future layout proposed by your company. To this end, Chris Voll from Church Communities Australia will contact Mr Adrian Maddocks from your company to arrange a convenient time for a discussion between the representatives of Church Communities Australia Limited and Wind Prospect.

Yours faithfully

To: Adrian Maddocks
Subject: Wellingrove Wind Towers

Adrian,

I have just been looking at the two turbine location maps on your website and I am intrigued as to why on the map of the 3.3 mw locations which obviously has 31 less towers than the 2.2 ms why you would have left the four towers insitue, which are the bone of contention for the concerned Wellingrove residents, and removed in particular the seven towers in a semi- circle on the eastern boundary of the property "Osterly" which should be of no concern to anybody. These seven sites are obviously suitable for towers or they would not be included as sites for the smaller turbines, they are closer to the power grid and would remove a source of conflict for you if you relocated the offensive four towers that will dominate the village. Whilst not trying to be offensive, it would inspire us to fight even harder to have those towers deleted from the windfarm if you were prepared to delete non offensive towers and leave those four in your proposal.

I would be grateful if you could give us an explanation or if it simply did occur to you, you might like to reconsider the plan because I am sure if those four turbines where not on the plan we would disappear off your radar.

Yours Sincerely

Adrian in regards to the meetings being held in Glen Innes and Inverell will anyone be representing the government and various departments.

We have two dwellings on our place with views facing the proposed development how with your combination of hills, tree planting and sheltering dwellings are you going to screen the development and when did you enter our place to come up with the proposal.

You have discussed compensation with proposed opponents to the development when will you be approaching my Wife and I.

At this point it has only being through me approaching you through Email and when I came across you photographing our place that contact has been made.

If you require more access to our place please ring and arrange a time.

3 February 2011

Dear Adrian

RE: Sapphire Wind Farm

Further to our conversation yesterday, 2 February 2011 at Glen Innes Open Day, we would like to confirm the matters discussed with you.

██████████ and I were devastated upon viewing the photograph taken by your associate from our property's boundary. The photomontage showing 56 wind towers was a shock we had no idea that there would be so many towers within view, cluttering our favourite outlook. We felt excluded and uninformed as to the situation that has been thrust upon us.

As explained to you, we feel we are in a unique position being between two properties that are both having wind towers erected. We consider we have been overlooked, because we aren't actually involved, but would like to rectify that if at all possible.

As indicated by you, we anticipate that we will be able to engage in a worthwhile discussion with your ecology/environment officer regarding several issues. These are access to build/service the installed towers, possible supply of aggregate, maybe a BioBank. Top of our desires is that you will make a worthwhile offer to acquire the entire property that we purchased almost 3 years ago, as it was then a peaceful, slow moving environment the reason we moved here. Adrian, our dream is dashed.

It is imperative we talk with you in the near future.

Yours faithfully,

████████████████████

21st August 2009

Dear Sir

RE: THE PROPOSED SAPPHIRE WIND FARM DEVELOPMENT AND ALA 19

I refer to your letter dated 22nd May 2009, regarding the proposed Sapphire Wind Farm Development at Kings Plains, and your request for feedback on any issues that may impact on, or be of concern to, Pan Gem Resources (Aust) Pty Ltd's current exploration and mining tenements in the area.

Pan Gem Resources (Aust) Pty Ltd is the current applicant for Assessment Lease Application No. 19, covering part of the property of "Weean". The locations of the proposed wind turbines do not appear to adversely impact on ALA 19. Furthermore, provided that no underground power lines connected to the proposed wind turbines cross ALA 19, then Pan Gem Resources (Aust) Pty Ltd has no objections to the proposed Sapphire Wind Farm.

Nevertheless, Pan Gem Resources (Aust) Pty Ltd reserves any and all exploration and mining rights that it has in respect of the area covered by ALA 19.

Yours faithfully

Dr. Simon R. Pecover

ATTENTION: ADRIAN MADDOCKS21st August 2009

Dear Sir

**RE: THE PROPOSED SAPPHIRE WIND FARM DEVELOPMENT AND
EXPLORATION LICENCES 7301 & 7302**

I refer to your letter dated 22nd May 2009, regarding the proposed Sapphire Wind Farm Development at Kings Plains, and your request for feedback on any issues that may impact on, or be of concern to, Volcan Australia Corporation Pty Ltd's current exploration and mining tenements in the area.

Volcan Australia Corporation Pty Ltd is the current title holder of exploration licences 7301 and 7302, within which wind turbines are proposed to be built along the southern edge of Kings Plains, and north-east and north-west of Swan Vale.

The locations of the proposed wind turbines do not appear to adversely impact these licences. Therefore, Volcan Australia Corporation Pty Ltd has no objections to the proposed Sapphire Wind Farm.

Nevertheless, Volcan Australia Corporation Pty Ltd reserves any and all exploration and mining rights that it has in respect of the area covered by exploration licences 7301 and 7302.

Yours faithfully

Sholom D. Feldman

Subject: Sapphire Wind Farm Mineral Title Map
Attachments: Wind Prospect - Kings Plains Biobanking sites009.pdf

Importance: High

Dear Adrian,

As Simon has recently left our company, I will be taking over his role in liaising with you regarding the placement of the proposed bio-banking sites. Two of these sites, outlined in your correspondence (attached) may have the potential to sterilize sapphire resource (as discussed by Simon in his email below).

Basically, in this region, land that is level and usually covered by degraded grassland (alluvial flats) we would wish to keep available for exploration and mining. Land that is on sloping or hilly ground, and often covered with remnant stands of native vegetation does not have likely potential for sapphire resource.

Within your proposed bio-banking sites, the areas of interest to us, and those that we would not wish to see excluded from mining and exploration are:

1. The northern portion of your southernmost bio-banking area near Mt Buckley where it covers alluvial ground south of the road (could you instead take up some of the more hilly vegetated ground closer to or within your defined wind farm area).
2. The eastern portion of your bio-banking area west of the intersection of the Western Feeder road and the Swan Brook Road – again where it sits over flat open pastureland.

Please do not hesitate to contact me regarding this matter.

Kind regards,

Robert Coenraads
Principal Project Geologist

Subject: Re: Reportage for EL's 5927 & 6215
Importance: High

Hi Robert

FOR YOUR URGENT ATTENTION & ACTION

Please see attached correspondence from Wind Prospect re their wind farm proposals for Kings Plains.

They are proposing 4 separate bio-banking areas at Kings Plains within both AGR & Volcan tenements.

My recommendation with respect to the proposed bio-banking areas near Mt Buckley and immediately west of the intersection of the Western Feeder road and the Swan Brook road, at the northern and southern ends of Kings Plains Creek, is that ARG should object strongly to the gazettal of those two areas as bio-banking sites (*which if they go ahead will exclude exploration and mining over those areas in the future*), as they have significant sapphire prospectivity value.

This matter needs to be dealt with by you and Sholom asap if you want to preserve the ground in question (*I did mention this matter to Sholom many weeks ago, but I am not sure if anything was done*).

Thanks & Cheers

Simon

Goodday Adrian

Thanks for the map and letter

It appears we both have an interest in the same area West of Glen Innes ela 4151 .

I have no title on this area as yet but my Application has been accepted and in the system (change of Gov) slowed things down I am led to beleive

I am happy to call into your office Newcastle and give you an insight into my plans for Valbob Mining Pty.Ltd for this lease area.

Will call Friday and make appointment to see you next week

Regards Bobby Allen

Dear Bob,

Thanks for your call today, it was good to speak with you about the wind farm project and your prospective mining exploration licence near Glen Innes. I have attached a copy of the original letter and map which went out to Lightning Ridge (and back!) informing you of the proposed wind farm.

I would be happy to meet with you to discuss the matter further and I am around all this week and next. Please give me a call to arrange a suitable time and you are welcome to come to our offices in Newcastle (address below). We can then discuss the project in more detail and determine the best way forward.

I look forward to hearing from you.

Regards,
Adrian

Public Opinion Survey

BY: _____

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is useful to us in making sure we have thoroughly identified local community concerns. We feed this information back into the project and thereby allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☒5 - 15km ☐Over 15km ☐

Do you approve of wind being used to generate renewable electricity?

Yes ☒No ☐No view ☐

On hearing of our proposal, what was your initial view?

I support it ☐I don't support it ☐Undecided ☒

What do you see as the main benefits of the proposed project?

SOME people may benefit financially & obviously benefit power production & short term employment. The wind farm company would obviously benefit financially.

What are your main concerns about the proposed project?

land devaluation strike effect (we have a son on the Autism Spectrum Disorder & this could affect him) Noise levels

Do you have any other comments about the proposed project?

We would find this easier to support if no turbines would be on the edge of the village (over-looking the village)

If you would like to receive further information about the Sapphire Wind Farm, please let us know. Any details you provide will be held in the strictest confidence and used only to update you on the project.

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is useful to us in making sure we have thoroughly identified local community concerns. We feed this information back into the project and thereby allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☐5 - 15km ☐Over 15km ☒

Do you approve of wind being used to generate renewable electricity?

Yes ☒No ☐No view ☐

On hearing of our proposal, what was your initial view?

I support it ☒I don't support it ☐Undecided ☐

What do you see as the main benefits of the proposed project?

Less coal will be used and any renewable - free - resources used is a no brainer.

What are your main concerns about the proposed project?

I have no concerns whatsoever.

Do you have any other comments about the proposed project?

Thank you for providing this service. I can't thank you enough - I hope it definitely goes ahead. About time!

If you would like to receive further information about the Sapphire Wind Farm, please let us know. Any details you provide will be held in the strictest confidence and used only to update you on the project.

Q: How close do you live to the wind farm?

A: Within 15km

Q: Do you approve of wind being used to generate renewable electricity?

A : Yes

Q: How do you feel about the proposed wind farm?

A : Im undecided

Q: What do you see as the main benefits of the proposed project?

A : We understand the need for another source of energy.

Q: What would be your main concerns about the proposed project?

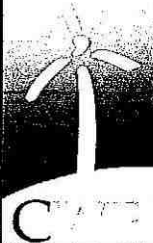

A : The only concern is the noise factor.

Q: Does this website provide appropriate information?:

A : Yes :

Q: Any other comments

We Live at [REDACTED] but have land close to the proposed site. So we are interested in the wind farm proposal. Can you please let us know when the exhibition day is on?

0 - 5km ☐

5 - 15km ☐

Over 15km ☒

Do you approve of wind being used to generate renewable electricity?

Yes ☒

No ☐

No view ☐

On hearing of our proposal, what was your initial view?

I support it ☒

I don't support it ☐

Undecided ☐

What do you see as the main benefits of the proposed project?

NO POLLUTION TO THE AIR OR WATER

WIND IS FREE & WON'T RUN OUT

What are your main concerns about the proposed project?

Compensation for residents who are distressed by sight or noise should be considered (relocation assistance perhaps)
(or land value)

Do you have any other comments about the proposed project? SHOULD BE MORE OF IT

AT LAST GETTING AWAY FROM TOXIC FOSSIL FUELS AND GREENHOUSE GASES. I understand that some locals are distressed by the project - Benefit to the many ~ problem to only a few.

How close do you live to the proposed wind farm?

0 - 5km ☐

5 - 15km ☐

Over 15km ☒

Do you approve of wind being used to generate renewable electricity?

Yes ☒

No ☐

No view ☐

On hearing of our proposal, what was your initial view?

I support it ☒

I don't support it ☐

Undecided ☐

What do you see as the main benefits of the proposed project?

Our badly abused environment!

What are your main concerns about the proposed project?

The short life span of 20-25 years and the chance that the site may be decommissioned. I would prefer to see the equipment upgraded to extend the wind farm's life.

Do you have any other comments about the proposed project?

The sooner it's up and running, the better.

Sapphire Wind Farm : Have Your Say

Name:

Email:

Address:

Phone:

IP Address:

Q: How close do you live to the wind farm?

A: Within 15km

Q: Do you approve of wind being used to generate renewable electricity?

A : Dont know

Q: How do you feel about the proposed wind farm?

A : I dont support it

Q: What do you see as the main benefits of the proposed project?

A :

Q: What would be your main concerns about the proposed project?

A : the contaimation of that beautiful picture you have on the home page of your web site.

Why not have the towers placed on Sydney Heads I am sure the wind force would be better in that area. Why spoil such a beautiful landscape. People have chosen to live in this area for all the right reasons and given up all the serves that the people enjoy such as mobile phone and broadband in the towns . Why should some industrial company think they have the right to destroy this enviroment with visual pollution and noise . These towers are so close to a lovely Heritage Village that just happens to be the first site that was chosen for Glen Innes township. How could you destroy the landscape in such a way. The Aboriginal people are right we don't care for this land . With all the destruction of this wonderful enviroment that we allow it is shamefull.

Q: Does this website provide appropriate information?:

A : No : No it doesn't show enough consideration to the people who live in the area. How about more information about the noise impact and the visual impact . We live in a wonderful beautiful country and these towers will only be good for approximately 20yrs . Isn't anyone concerned about the humans that inhabit this area . Is it always just about money ?. The poor bloody land holders that have been in drought for years, you have them by the balls because they would need the money and so its like waving a carrot on a stick covered with industrial poisonand noise pollution but the people do not know this.

Q: Any other comments

Q: How close do you live to the wind farm?

A: Within 15km

Q: Do you approve of wind being used to generate renewable electricity?

A : Yes

Q: How do you feel about the proposed wind farm?

A : I dont support it

Q: What do you see as the main benefits of the proposed project?

A : The owners of the land, the towers will be built upon will get some monetary compensation at the expense of their neighbours. Some businesses in the surrounding towns may benefit but that is not a local benefit. They are 30km away. There are no other benefits for the community. Inverell and Glen Innes are not the local community, Swan Vale and Kingsplains are the local communities. This is not Sapphire as you call it. Shows your lack of community discussion when you don't even know what the area is called.

Q: What would be your main concerns about the proposed project?

A : Land values hurt, community disintegration, fighting neighbours, spoiling natural landscape and quality of life for local residents.

Q: Does this website provide appropriate information?:

A : No :

Q: Any other comments

Should not be located here, in a close settlement farming/grazing area. Build it in an unpopulated area (what about a large National Park). I suppose you believe this is an unpopulated area and we don't matter. This is a lifestyle farming district, the building of towers will spoil this and devalue our land. People choose to live here for the views and picture perfect natural landscape. If we wanted to see 50 story man made structures we would move to the city. I don't want to look out my window and see man made towers painted white, on purpose to make them as visible as possible to destroy my view of the surrounding hills. You are proposing to build them on the higher parts of the landscape so they are highly visible from long distances. Why not build them on the coast or other areas of high wind? or in towns and cities with high winds? I know because the communities don't want them, for all of my above reasons. But you want to build them in the country because we don't matter and we don't have the greater population numbers to rally against it. Put it somewhere else. There are quite a few National Parks in this region, why not build the towers there? If its not good enough for the Government to have towers on public land, then why is it acceptable to build them on private land?

IP Address:

Q: How close do you live to the wind farm?

A: Within 15km

Q: Do you approve of wind being used to generate renewable electricity?

A : Yes

Q: How do you feel about the proposed wind farm?

A : I support it

Q: What do you see as the main benefits of the proposed project?

A : Turning wasted energy into a renewable resource, Jobs for the area

Q: What would be your main concerns about the proposed project?

A : I'm guessing noise, but what I have seen in WA I don't believe it's that big of concern

Q: Does this website provide appropriate information?:

A : Yes :

Q: Any other comments

I hope the project go's ahead we need

Q: How close do you live to the wind farm?

A: Over 30km away

Q: Do you approve of wind being used to generate renewable electricity?

A : No

Q: How do you feel about the proposed wind farm?

A : I dont support it

Q: What do you see as the main benefits of the proposed project?

A : None. It is only a benefit to greedy developers and the slug who hosts the turbines.

Q: What would be your main concerns about the proposed project?

A : Wind is a useless source of electricity generation. Developers set about dividing the community for the sake of making money for themselves. Disgraceful.

Q: Does this website provide appropriate information?:

A : No : There is no real information. It is just a PR exercise. Get lost.

Q: Any other comments

No industrial wind on the grid. It is a farce

A: Within 15km

Q: Do you approve of wind being used to generate renewable electricity?

A : No

Q: How do you feel about the proposed wind farm?

A : I dont support it

Q: What do you see as the main benefits of the proposed project?

A : I do not see any benefits for our local community, except the benefits of 28 landholders in the whole of our local community. as stated on your website, your community benefits are in correct. provide us with proof of positive effects on local community and increased demand for goods..... show us proof that you will source local people to employ for your project. and of course you will not as no local people are not skilled in this field!!!!!!!!!!!!!!

Q: What would be your main concerns about the proposed project?

A : infrasound is a concern to breeding stock, local flora and fauna and to humans. Wind energy project will not stop coal fired power stations, it is seemed to be in green energy guide lines for 2020. If this does not stop coal fired power how is it bettering green energy in Australia??????, negative visual impact. not enough consistant wind per annum!!!!!!!!!!!!!!

Q: Does this website provide appropriate information?:

A : No : it is one of the better wind farm sites. still cannot find an accurate map on your site where we can see the placement of turbines in your proposed development.....

Q: Any other comments

as spoken with Adrian Maddocks very concerned resident of being a landholder under 1.7kms from proposed turbines in your development. a stressful issue for my family with 4 young children under 5 years.....

Address: [REDACTED]
[REDACTED]
Phone: [REDACTED]
IP Address: [REDACTED]

Q: How close do you live to the wind farm?

A: 15-30km away

Q: Do you approve of wind being used to generate renewable electricity?

A : Yes

Q: How do you feel about the proposed wind farm?

A : I support it

Q: What do you see as the main benefits of the proposed project?

A : The biggest benefit is the fact that people are going to be able to generate their own renewable power by connecting up to the wind farms! At this point in time, renewable energy is desperately needed - and wind is a perfect natural resource to make the most of.

Q: What would be your main concerns about the proposed project?

A : My main concerns are about the effects that the wind farms will have on birds and other airborne creatures - particularly bats, as their senses would not pick up on the fact that they might be flying towards a moving propeller. It poses a great risk to all those that fly. But depending on the speed that the turbines are moving at, this problem could be dealt with.

Q: Does this website provide appropriate information?:

A : Yes :

Q: Any other comments

Build the wind farm - STAT! =)

Public Opinion Survey

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is useful to us in making sure we have thoroughly identified local community concerns. We feed this information back into the project and thereby allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☒

5 - 15km ☐

Over 15km ☐

Do you approve of wind being used to generate renewable electricity?

Yes ☐

No ☒

No view ☐

On hearing of our proposal, what was your initial view?

I support it ☐

I don't support it ☒

Undecided ☐

What do you see as the main benefits of the proposed project?

NONE.

What are your main concerns about the proposed project?

① NOISE

② DEVALUE OF PROPERTIES WHEN TRYING TO SELL

③ VISUAL POLLUTION

Do you have any other comments about the proposed project?

TO CLOSE TO WELLINGBORE VILLAGE.

If you would like to receive further information about the Sapphire Wind Farm, please let us know. Any details you provide will be held in the strictest confidence and used only to update you on the project.

We would be pleased if you could spare a little time to answer the following questions and return the form. Your feedback is useful to us in making sure we have thoroughly identified local community concerns. We feed this information back into the project and thereby allow for the best possible wind farm proposal to be submitted.

How close do you live to the proposed wind farm?

0 - 5km ☐

5 - 15km ☐

Over 15km ☒

Do you approve of wind being used to generate renewable electricity?

Yes ☐

No ☒

No view ☐

On hearing of our proposal, what was your initial view?

I support it ☐

I don't support it ☒

Undecided ☐

What do you see as the main benefits of the proposed project?

NO MATTER HOW MANY WIND FARMS ARE APPROVED IN AUSTRALIA THEIR CONTRIBUTION TO CLEANER AIR CAN ONLY BE MINIMAL. IN THE LONG TERM THEY ARE UNVIBBLE AND UNRELIABLE.

What are your main concerns about the proposed project?

THE TURBINES VISUALLY CONTAMINATE 1000'S OF ACRES OF MOSTLY BEAUTIFUL COUNTRY SIDE. COAL FIRED POWER STATIONS DO NOT. POLLUTION FROM COAL POWERED POWER STATIONS IS GROSSLY OVER EXAGGERATED.

Do you have any other comments about the proposed project?

THE SAPPHIRE WINDFARM WILL NOT CAUSE US ANY CONCERN. HOWEVER WE DO RESIDE WITHIN 2K OF THE NEAREST TURBINE OF THE PROPOSED GLEN INNES WINDFARM.

If you would like to receive further information about the Sapphire Wind Farm, please let us know. Any details you provide will be held in the strictest confidence and used only to update you on the project.

How close do you live to the proposed wind farm?

0 - 5km ☒

5 - 15km ☐

Over 15km ☐

Do you approve of wind being used to generate renewable electricity?

Yes ☒

No ☐

No view ☐

BUT I THINK THERE ARE BETTER OPTIONS LIKE TIDAL

On hearing of our proposal, what was your initial view?

I support it ☐

I don't support it ☒

Undecided ☐

What do you see as the main benefits of the proposed project?

THERE ARE NO BENEFITS WHATSOEVER TO RESIDENTS ADJACENT TO TOWERS UNLIKE THOSE WHO HAVE THEM ON THEIR LAND

What are your main concerns about the proposed project?

*PROPERTY VALUES
NOISE & FLICKER (ANY AMOUNT ABOVE ZERO IS TOO MUCH)
VISUAL POLLUTION (THERE IS NO WAY THEY CAN FIT INTO THE ENVIRONMENT)*

Do you have any other comments about the proposed project?

AUSTRALIA IS A BIG COUNTRY WITH PLENTY OF WIND INCLUDING OFF SHORE. THERE IS NO NEED TO PLACE TOWERS WHERE THEY HAVE ANY EFFECT ON HUMANS. YOU WOULD NOT BE ALLOWED TO IMPACT ON NATIVE ANIMALS.

If you would like to receive further information about the Sapphire Wind Farm, please let us know. Any details you provide will be held in the strictest confidence and used only to update you on the project.

5 - 15km ☐

Over 15km ☒

Do you approve of wind being used to generate renewable electricity?

Yes ☒

No ☐

No view ☐

On hearing of our proposal, what was your initial view?

I support it ☒

I don't support it ☐

Undecided ☐

What do you see as the main benefits of the proposed project?

Increased energy production without extra CO₂ emissions.
Non-concentrated generation sites - lower transmission losses and
possible strategic benefits - less likelihood of catastrophic outages.

What are your main concerns about the proposed project?

The possible visual effect if the site is close to the Cowdydie Highway.
Tree preservation and/or planting are possible mitigants.

Do you have any other comments about the proposed project?

I would like to see this & other wind projects supplemented by
renewable sources of base load electricity.

If you would like to receive further information about the Sapphire Wind Farm, please let us know. Any details you provide will be held in the strictest confidence and used only to update you on the project.

[Redacted]

Do you believe that the wind farm will have a positive, negative, or neutral impact on the landscape?

..... *Neutral.*

Do you have any other comments or suggestions?

Our first impression was that it may have caused some disruption to the village but now we say go ahead we are not worried we believe it won't concern us
